ATC OFFSHORE

COURSE OVERVIEW

TLILIC2005 – LICENCE TO OPERATE A BOOM-TYPE ELEVATING WORK PLATFORM

(BOOM LENGTH 11 METRES OR MORE)

This course is designed to ensure that participants have the skills and knowledge required to operate a boom-type elevating work platform (boom length 11 metres or more) for licensing purposes, and involves the operation of a telescoping device, hinged device, or articulated device or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work.

This course requires the operator to plan the work, conduct routine checks, set up elevating work platform, operate elevating work platform and shut down and secure elevating work platform. This course is based on the requirements of the National Standard for Licensing Persons Performing High Risk Work.

PERFORMANCE CRITERIA

- Plan work
- Conduct routine checks
- Set up elevating work platform
- Operate elevating work platform
- Shut down and secure elevating work platform.
